Table B. War Establishment of a Division 101
Table C. War Establishment of a Mounted Brigade 103

SECTION 1

NOTES ON CANADIAN MILITIA WAR ESTABLISHMENTS

I. Definition.

1. Its " war establishment " is the number of officers and men and the number of animals with which a unit is required to take, and keep, the field.

II. Mobilization.

2. In the event of a partial mobilization, the nature of the force to be employed will depend on varying circumstances, and special instructions will be issued regarding the strength and organization of the units to be mobilized.

3. In the event of a general mobilization, the whole of the active militia will be placed on a war footing, and Canadian Militia War Establishments will take effect.

III. Allotment of Units.

4. Units are allotted either to the field army or to garrison duties; or they are "" unallotted," *i.e.*, held in reserve available for general purposes.

5. The field army consists of (*a*) field units and (*b*) L. of C. (line of communication) units.

(*a*) Field units are mobile units allotted to field formations (divisions, brigades, etc.) or detailed as L. of C. defence troops.

(*b*) L. of C. units are administrative units on lines of communication.

6. Canadian Militia War Establishments deal with field and L. of C. units, as above defined. Field units which exist in peace but for which war establishments are not herein prescribed, will mobilize at their peace establishments; units allotted to garrison duties, at the war establishments detailed for them in defence schemes; unallotted units, at the war establishments herein laid down for units of the same description.

IV. Formations.

7. The formations to be considered are the infantry brigade, the division and the mounted brigade. The composition of each is given in Section 3; and the units allotted to the divisions and brigades already organized, or partially organized, are detailed in the quarterly Militia List.

8. On concentration, two or more divisions, with or without mounted brigades, may be grouped together; in which case special instructions will be issued regarding the organization of the headquarters of the command.

9. Similarly, two or more mounted brigades may be combined; in which case there is nothing to prevent the officer in command from withdrawing in whole or part from any one or more of them their artillery, engineers, signal troops, trains and ambulances, for the purpose of applying the services of those units as he may think advisable.

V. Personnel.

10. The war establishments of cavalry regiments and infantry battalions include machine-gun sections, which will be absorbed by squadrons and companies if machine-guns are not issued.

11. Chaplains will be attached to units as required.

12. Bicycles, unless otherwise stated, are provided for intercommunication, and will be ridden by men specially selected for the purpose.

13. Bâtmen are enlisted men, and are available for duty in the ranks. They are allowed at the rate of one for each dismounted officer or mounted officer with one horse, and two for each mounted officer with two horses.

14. Dismounted personnel of mounted units will march either with the 1st line transport or with the train, as may be ordered.

VI. Transport Arrangements.

15. A limited number of 1st line transport vehicles are held either in regimental or in ordnance charge. With which exception, carts and wagons will be obtained locally (by requisition, if need be) on mobilization; and to suit local conditions a certain amount of adjustment may be necessary; *e.g.*, pack saddlery may have to be replaced by carts, carts by wagons, and so on.

16. Country carts or light wagons (2-horsed) are calculated to carry a maximum load of about 1,200 lbs.; other country wagons (2-horsed) a maximum load of about 2,000 lbs.

17. For the purpose of explaining how the numbers of drivers, draught horses, etc., have been calculated, the transport of each unit is shown in detail immediately after its war establishment.

18. Train transport is mobilized by units; but on concentration it will be withdrawn and handed over to the Army Service Corps.

Except when troops are stationary in quarters, officers commanding field units, other than trains, will detail one man to accompany each vehicle for escort and loading duties, each party being in charge of a non-commissioned officer or the oldest soldier.

In the case of field troops and companies C.E., signal units, field ambulances and cavalry field ambulances, vehicles required for the transport of baggage are not included in the train; nor, in the case of signal troops, for the transport of supplies.

19. The Army Service Corps provides train transport personnel for all units; also 1st line transport personnel for the headquarters of divisions and brigades (mounted and infantry).

20. Army Service Corps 1st line transport drivers are included in the war establishment of the unit to which they are detailed. In the tables relating to trains (divisional and mounted brigade) they are shown in *italics* but are not included in the total personnel.

In the case of Army Service Corps train transport drivers, the procedure is reversed. In the tables relating to trains they are included in the total personnel; while in tables relating to other field units they are not so included, but shown in *italics*.

21. Horses and vehicles which in the accompanying tables are shown in *italics* are not included in the totals, although they are produced by the units which require them (Note 15). They are included in the totals of the trains.

22. For field units (excepting heavy batteries and ammunition columns for which a special scale is authorized) and for reserve parks, spare draught horses are allowed at the rate of 10 per cent.

23. For each pair of spare horses a driver is provided; and spare drivers are allowed at the rate of 10 per cent. after including the drivers for spare horses (except in the case of divisional ammunition columns, where 5 per cent. only are allowed).

24. The war establishment of a train includes spare drivers and draught horses for the upkeep of the train transport required by other units in the same formation.

25. Transport for ammunition and supplies has been calculated on the supposition that divisions and brigades include their full complement of units; if such be not the case, the war establishments of trains and columns must undergo proportionate reduction.

VII. Medical Arrangements.

26. The medical arrangements for units for which medical officers are not provided in war establishments, are as follows:—

Units included in a brigade (mounted or infantry)—in charge of a medical officer to be detailed by the brigade commander.

Units included in divisional artillery—in charge of a medical officer with an artillery unit, to be detailed by the divisional artillery commander.

Field companies of engineers—in charge of the medical officer with divisional engineer headquarters.

Other divisional troops—in charge of a medical officer to be detailed by the assistant director of medical services with divisional headquarters.

Units on lines of communication—in charge of medical officers specially detailed.

VIII. Sanitation and Water Supply.

27. In each of the following field units men, as shown, are detailed to perform sanitary duties:—

Units		N.C.Os.	Privates
Cavalry regiment Field artillery brigade Field artillery (howitzer) brigade Divisional ammunition column Infantry battalion	each	1	8
Divisional train		1	3
Signal company		..	4
Horse (or 13-pr. field) artillery battery and mounted brigade ammunition column Heavy artillery battery and ammunition column Field troop Field company Mounted company, corps of guides Mounted brigade train	each	..	2
Signal troop		..	1

28. In the field, the medical officer in charge of a regimental unit is responsible to the commanding officer for the purity of the water supply.

29. Each cart (or light wagon) for water is calculated to carry about 120 gallons.

IX. Veterinary and Farriery Arrangements.

30. The veterinary arrangements for units for which veterinary officers are not provided in war establishments are as follows:—

Units included in a mounted brigade—in charge of a veterinary officer to be detailed by the brigade commander.

Units included in an infantry brigade—in charge of the veterinary officer with brigade headquarters.

Divisional troops—in charge of a veterinary officer to be detailed by the assistant director of veterinary services with divisional headquarters.

Units on lines of communication—in charge of veterinary officers specially detailed.

31. For units which are not provided with farriers or shoeing-smiths, the shoeing of horses is carried out by the farriers of trains.

X. War Outfit.

32. Its " war outfit " is the material of all kinds which a unit requires in the field. War outfit is as regards material what war establishment is as regards personnel and horses.

33. War outfit affects transport and, therefore, war establishments. The normal scale of war outfit is calculated to satisfy the conditions which the circumstances of a general mobilization would be most likely to impose. Under other conditions it might become necessary to alter the normal scale, in which case special instructions would be issued.

34. The tables in Section 2 show the scales of ammunition, tools, rations, forage and fuel, on which the normal scale of transport has been based.

35. Blankets for men are not included in the normal scale of war outfit; but one blanket per man will be carried as " special equipment," if ordered. In units where this necessitates an addition to the normal scale of transport, the extra personnel, animals and vehicles required are shown in a note on the war establishment tables.

SECTION 2

DATA ON WHICH THE TRANSPORT OF UNITS IS CALCULATED.

N.B.—Country carts or light wagons (2-horsed) are calculated to carry a maximum load of about 1,200 lbs.; other country wagons (2-horsed) a maximum load of about 2,000 lbs.

TABLE I.—AMMUNITION

(A) Approximate number of rounds provided in the field per gun and howitzer

Ammunition for—	With battery	With ammunition columns					Total with field units	With ammunition parks		Other reserves on L. of C.	Total maintained in the field
		Mounted brigade	Field artillery brigade	Field artillery (howitzer) brigade	Heavy artillery	Divisional		Mounted brigade	Divisional

60-prs. B.L.	75	..	..	..	50	60	185	..	70	245	500

NOTE.—The capacity, in rounds, of vehicles allotted for gun ammunition is as follows:—

Vehicles	Number of rounds						Remarks
	13-pr. Q.F.	18-pr. Q.F.	5-in. B.L. howitzer	4.5-in. Q.F. howitzer	4.7-in. Q.F.	60-pr. B.L.	
Gun carriage limber	24	24	16	12	..	..	
Ammunition wagon, with limber	76	76	48	48	..	..	
G.S. wagon	144	108	55	66	40	40	
Country wagon (average)	88	70	32	40	25	25	
Lorry, 3-ton	270	224	98	112	100	100	

TABLE I.—AMMUNITION—Continued

(B) Approximate number of rounds provided in the field for each man armed with the rifle.

Arm	On soldier	In regimental reserve	With ammunition columns			Total with field units	With ammunition parks		Other reserves on L. of C.	Total maintained in the field
			Mounted brigade	Field artillery brigade	Divisional		Mounted brigade	Divisional		
Cavalry allotted to { mounted brigades	100	100	100	..	..	300	100	..	100	500
Cavalry allotted to { divisions	100	100	..	50	50	300	..	100	100	500
Artillery	50(*a*)	..	..	..	..	50	..	..	..	50
Engineers	50	50(*b*)	..	..	..	100	..	..	..	100
Corps of Guides	50	..	..	..	..	50	..	..	..	50
Infantry	150	100	..	50	50	350	..	100	100	550
Signalling Corps	50	..	..	..	..	50	..	..	..	50
Army Service Corps	20	..	..	..	..	20	..	..	..	20
Ordnance Corps	20	..	..	..	..	20	..	..	..	20

(*a*) Per man. (*b*) For dismounted men only.

NOTES.—1. For the purpose of arriving, approximately, at the number of rounds to be carried in ammunition columns and parks, the number of rifles is calculated at 500 for cavalry regiments and at 1,000 for infantry battalions. Other units are not considered.

2. The capacity, in rounds, of vehicles and animals allotted for small arm ammunition is, approximately, as follows:—S.A.A. cart, 16,000; limbered G.S. wagon, 16,000; G.S. wagon, 40,000; country wagon, 25,000; pack animal, 2,000; lorry (3-ton), 80,000.

TABLE I.—AMMUNITION—Continued

(C) Approximate number of rounds provided in the field for each machine-gun:—

Distribution	Cavalry allotted to—		Infantry
	Mounted brigade	Division	
With regiments, or battalions, service ammunition	3,500	3,500	3,500
With regiments, or battalions, regimental reserve	16,000	16,000	8,000
With ammunition columns, mounted brigade	10,000	....	....
With ammunition columns, field artillery brigade	....	5,000	5,000
With divisional ammunition columns	....	5,000	5,000
With ammunition parks, mounted brigade	6,000	....	....
With ammunition parks, divisional	....	6,000	6,000
Total	35,500	35,500	27,500

(D) Approximate number of rounds provided for each pistol.

For each pistol a total of 36 rounds is carried in the field, viz.: 12 rounds on the man, 12 rounds in regimental transport, and 12 rounds with the brigade (or heavy artillery) ammunition column.

TABLE II.—TOOLS AND EXPLOSIVES

Wagon and cart equipment, also tools issued with machine-gun tripods, are excluded from this table (*see* footnote).

Tools, etc.	Cavalry regiment	Field artillery brigade 18-pr.	Field artillery (howitzer) brigade	Horse artillery battery	Field artillery battery 18-pr.	Field artillery (howitzer) battery	Heavy artillery battery	Mounted brigade ammunition column	Heavy artillery battery ammunition column	Field troop	Field company	Infantry battalion	Headquarters infantry brigade	Remarks

Sandbags	150	..	..	..	..	..	..	..	..	264	852	30	..	

NOTE.—G.S. wagons, also country carts and wagons, are each equipped with the following tools which are not included in the foregoing table:—
2 shovels, 1 pickaxe, 1 felling axe, and 1 billhook.

TABLE III.—RATIONS AND FUEL

Detail of rations and fuel carried in the field with units, and in A.S.C. trains and supply columns

How carried normally	Field Ration			Iron Ration	Remarks
	Bread and Meat Ration 1 lb. fresh or preserved meat (*a*): 1¼ lb. bread (*b*), or 1 lb. biscuit (*c*); 4 ozs. bacon (*d*)	*Grocery Ration* Tea, sugar, jam, salt, pepper and cheese (as detailed in Allowance Regulations)	*Vegetable Ration* 2 ozs. dried	1 lb. preserved meat, 12 ozs. biscuit, ½ oz. tea, 2 ozs. sugar, 3 ozs. cheese	
On the soldier. . . .	(*e*)	(*e*)	..	1 (*h*)	(*a*) Packed in wooden cases not exceeding 80 lb. weight, containing 60 rations in 1-lb. tins.
In vehicles for cooks, or travelling kitchens.	1	1	..	..	(*b*) Carried in sacks. (*c*) Packed in wooden cases not exceeding 80 lb. weight, containing 50 rations.
	(*f*)	(*f*)	1	..	(*d*) Packed in wooden cases containing 60 lb. bacon, not exceeding 80 lb. net weight. (*e* The day's bread and cheese ration issued the previous evening, less any portion consumed. In the case of arms other than infantry, this ration may be carried in the vehicle for cooks. (*f*) The day's ration (except bread and cheese) issued the previous evening, less any portion consumed
In A.S.C. trains or in supply columns	1	1	1	..	(*g*) Less any portion consumed of the ration carried on the soldier and in the vehicles for cooks.
Total.	2 (*g*)	2 (*g*)	2 (*g*)	1 (*h*)	(*h*) A second iron ration may be carried when specially ordered.

NOTES.—1. No fuel will be carried normally, except for mechanically propelled vehicles. The wood of the ration boxes will be issued for kindling purposes, and be supplemented by fuel obtained locally.
2. Reserve parks, each with a carrying capacity of 2 days' iron rations will be available for use if required.
3. Fresh vegetables will be issued when available.

TABLE IV.—FORAGE

Detail of forage carried in the field with units, and in A.S.C. trains and supply columns, for each horse

How carried	*Oat ration* 12 lbs. (*a*)	Remarks
On the horse	1 (*b*)	(*a*) In the case of heavy draught horses the oat ration is 15 lbs.
In A.S.C. trains or in supply columns	1	(*b*) The day's ration issued the previous evening less any portion consumed.
		(*c*) Less any portion consumed of the ration carried on the horse.
Total	2 (*c*)	

NOTES.—1. The above scale of forage is applicable to a country where hay is available.

2. Reserve parks, each with carrying capacity of 2 days' reserve grain, will be available for use if required.

SECTION 3

COMPOSITION OF BRIGADES AND DIVISIONS.

I.—Composition of an Infantry Brigade.

Headquarters.
4 Infantry battalions.

II.—Composition of a Division.

Headquarters.
3 Infantry brigades (as above).

Divisional troops:—

Divisional mounted troops—
1 Cavalry (or mounted rifle) regiment.
1 Mounted company, Corps of Guides.

Divisional artillery—
Headquarters.
3 Field artillery brigades.
1 Field artillery (howitzer) brigade.
1 Heavy artillery battery and ammunition column.
1 Divisional ammunition column.

Divisional engineers—
Headquarters.
2 Field companies.

Divisional signal service—
1 Signal company.

Divisional supply and transport unit—
1 Divisional train.

Divisional medical units—
3 Field ambulances.

III.—Composition of a Mounted Brigade.

Headquarters.
3 Cavalry (or mounted rifle) regiments.
1 Horse (or 13-pr. field) artillery battery and a mounted brigade ammunition column.
1 Field troop.
1 Signal troop.
1 Mounted brigade train.
1 Cavalry field ambulance.

Privates	..	..	..	2	2
Butchers	..	..	..	4	4
Cook	..	..	..	1	1
Bâtman	..	..	..	1	1
Total depôt unit of supply	1	1	2	10	14

NOTES.—1. Each depôt unit of supply is sufficient for a depôt feeding 4,000 men and 1,000 animals.

2. If the depôt unit of supply is required to bake bread for the troops, one bakery section (page 93) must be added for every 4,000 rations of bread required.

3. Supply depôts will be formed of one or more depôt units of supply. Additional supply officers and labourers will be appointed to depôts so formed, in accordance with the requirements of each case.

AN ADVANCED REMOUNT DEPÔT (FOR 300 HORSES)

WAR ESTABLISHMENT
